Pressure ⁵	Outdoor Max (Cool / Heat)	dB(A) 50	50	56	56	56
Standard Warranty		5 Years Parts, 10 Years Compressor (Parts only, labour not included)				
Limited Registered Warranty ⁶		10 Years Parts, 10 Years Compressor (Parts only, labour not included)				

Note:
 1. Rated capacity at 0 ft. above sea level with 25 ft. of refrigerant line and a 0 ft. level difference between outdoor and indoor unit.
 2. Rated cooling capacity obtained with air entering the indoor unit at 26.7 °C dry bulb (DB) and 19.4 °C wet bulb (WB) and outdoor ambient conditions of 35 °C dry bulb (DB) and 23.8 °C wet bulb (WB).
 Rated heating capacity obtained with air entering the indoor unit at 21.1 °C dry bulb (DB) and 15.6 °C wet bulb (WB) and outdoor ambient conditions of 8.3 °C dry bulb (DB) and 6.1 °C wet bulb (WB).
 For capacity information, see engineering manual capacity tables.
 3. The Capacities at -15°C does not refer to H42 testing conditions.
 4. Airflow shown is in cooling mode.
 5. Sound pressure levels are tested in an anechoic chamber under ISO Standard 3745 and are the same in both cooling and heating mode. These values can increase due to ambient conditions during operation.
 6. For details please visit www.lg.ca (* Quebec customers are not required to register their products)
 Due to our commitment to continued innovation, some specifications may be changed without notification.

LGRED® SYSTEMS WITH LGRED® HEAT TECHNOLOGY

- SINGLE ZONE
- MULTI ZONE

SINGLE ZONE SOLUTIONS

LG single zone solutions combine outstanding heating and cooling performance with styling that works in any home design.

DUALCOOL® Prestige
● 9,000–24,000 Btu/h

Ceiling Casette
● 18,000–48,000 Btu/h

High Static
● 24,000–48,000 Btu/h

Vertical AHU
● 18,000–48,000 Btu/h

**LMU180HHV,
LMU240HHV,
LMU300HHV**

MULTI-ZONE SOLUTIONS

Multi F with LGRED® systems use a single inverter-driven outdoor unit to efficiently provide heating and cooling. Multi F with LGRED® provides powerful and personalized performance for larger-scale heating and cooling needs or a whole home, up to six rooms. **Capacity Range: 18,000 to 48,000 Btu/h**

**LMU360HHV,
LMU421HHV,
LMU480HHV**

Indoor Units for use with Multi F outdoor units:

Wall Mounted

DUALCOOL®
● 7,000–24,000 Btu/h

ARTCOOL® Mirror
● 9,000–18,000 Btu/h

Console
● 9,000–15,000 Btu/h

Ceiling Mounted and Ducted

Ceiling Casette
● 7,000–18,000 Btu/h

Low Static
● 9,000–18,000 Btu/h

High Static
● 24,000–36,000 Btu/h

Vertical AHU
● 18,000–36,000 Btu/h

Prestige with LGRED® Technology

INNOVATIVE COMFORT

Home Comfort Solutions by LG allow you to cool or heat your entire home or a single room without the need for invasive ductwork, which means no tearing down of walls or altering the appearance of your home. With LG, you can heat or cool any room to your favorite temperature!

How It Works

LG air conditioning systems for residential and light commercial applications consist of three basic components: an energy efficient inverter-driven outdoor unit, a stylish and quiet indoor unit that delivers conditioned air to the room, and compact conduit for refrigerant lines and wiring that connects the units. This design allows for energy conservation by targeting only those areas that need cooling or heating, a cost-effective feature when only certain portions of a building or home are being used.

The Advantages of Inverter Technology

Inverter variable speed outdoor units are measurably quieter and use less energy than conventional air conditioners, which continuously cycle on/off. Instead, an inverter compressor ramps up or down as needed to efficiently maintain comfort levels.

Stay comfortable all year long with industry-leading LGRED° heat technology.

LGRED°
Powerful Heat Technology
RELIABLE TO EXTREME DEGREES

WHAT IS LGRED° HEAT TECHNOLOGY?

Products featuring LGRED° heat (Reliable to Extreme Degrees) boast incredible performance under challenging conditions. Be toasty warm even in the coldest winter months, when traditional units are unable to keep up with demand. Expect 100% heating capacity down to -15° C and continuous heating operation, even when it's -30° C outside.

WHAT ARE ADVANTAGES OF LG SYSTEMS WITH LGRED° HEAT?

LG Systems with LGRED° offer all of the traditional benefits of LG duct-free and inverter technology while delivering industry-leading heating performance.

ENERGY EFFICIENT

UP TO
27.5
SEER

UP TO
13.5
HSPF

SEER: Your Guide to Cool Savings

An acronym for Seasonal Energy Efficiency Ratio, SEER is the industry-wide rating for energy consumption. The higher the number, the more efficiently a product will produce cool air, while conserving our natural resources. Your contractor will be happy to explain SEER numbers in greater detail, and help determine which LG duct-free split system is right for you.

HSPF: For Cost-Saving Coziness

Heating Seasonal Performance Factor, or HSPF, represents total heating output relative to electricity used. Like SEER, the higher the HSPF rating, the more efficiently a product will warm air. In climates where heating is necessary in winter months as well as cooling in the summer, ask your contractor to suggest the ideal LG duct-free split system.

Now Available with SEER2 & HSPF2 Ratings *
*Higher Efficiency/ Heating Performance for your system.

WHY LG HOME COMFORT SOLUTIONS

CONNECT for more CONVENIENCE with LG ThinQ®

LG provides built-in Wi-Fi connectivity, which means you don't have to pay extra money for the dongle to get smart functionality. Control systems from anywhere using the LG ThinQ® app including voice-control through Amazon, Alexa, and Google Home.

Flexible Room-by-Room Control

With a controller for each indoor unit, LG systems offer precise temperature settings in each zone or room while maximizing energy savings by heating or cooling only the zones in use. Available in a full range of capacities and indoor unit styles, including several types of ducted units.

Energy EFFICIENT

LG's inverter technology intelligently senses the air conditioning demand and proportionally ramps the inverter compressor up or down, unlike traditional systems that have limited ability to calculate proportional energy use relative to the demand.

WARM and COOL Airflow

Fast, powerful heating and cooling – LG systems provide powerful heating and cooling with ENERGY STAR efficiency. Stay comfortable all year long, even in extreme climates with our advanced heat pump technology.

QUIET Operation

LG duct-free systems operate at low sound levels, thanks to LG's unique low-vibration compressor, skew fan and brushless direct current (BLDC) motor technology that eliminates unnecessary noise and allows for smooth operation. LG indoor units are among the quietest in the industry, operating at decibel levels similar to the sound of rustling leaves.

10 Year Warranty

Use LG ARTCOOL® and DUALCOOL® with peace of mind. To enjoy the benefit of 10-year* parts and compressor warranty, please register your product at <https://www.lg.ca>

*Visit www.lg.ca for details.

Stylish Design

The LG Prestige air conditioner is designed to be harmonized with the interior of your home with minimal and basic style. The mirror glass on the front of the product reflects the surrounding environment to emphasize the interior and the integrity, and it delivers timeless beauty through the solidity of the glass material.

The Smarter Life
with **LG ThinQ®**

LG ThinQ® smart platform is a future ready app which allows much more than basic AC control.

Easily monitor and control your Air Conditioner at anytime and from anywhere with LG's exclusive home appliances control app on your smartphone.

VOICE CONTROL

LG Prestige ThinQ® models are compatible to your smartphones and AI speakers, such as Google Assistant or Amazon Alexa. From now on, you don't have to press a button, just say instead. LG will do the rest.

SMART CONVENIENCE

Switch on and adjust an LG AC even before entering home.

SMART SAVINGS & MONITORING

Remotely control and monitor an LG AC from anywhere, anytime.
